

WEEKLY PRE-AUDITOR SCAN

Friday Compliance Check

Week Ending: April 3, 2026 · Vantage Aerospace Systems, Inc.

◆ *SAMPLE OUTPUT — Fictional client (Vantage Aerospace Systems, Inc.) — Generated for demonstration purposes only* ◆

WEEK STATUS

✓ **AUDIT-READY**

All 7 compliance rules passed · 0 blocking issues · 1 advisory flag

7-RULE COMPLIANCE SCAN

Weekly Automated Rule Check

#	Rule	Check	Result
01	Daily labor distribution completeness	All 6 engineers logged ≥ 3 days this week	PASS
02	CLIN attribution coverage	100% of entries assigned to a CLIN	PASS
03	Hours reasonableness (per engineer per day)	No entries exceed 12 hours/day (max observed: 8.0)	PASS
04	Unallowable cost screening	0 unallowable entries this week	PASS
05	PM verification coverage ≥ 80%	88% verified (above threshold)	PASS
06	Gap detection — missing days	No engineer missed more than 1 consecutive workday	PASS
07	Labor category consistency	All entries match employee's official role; no cross-coding	ADVISORY

ADVISORY DETAIL

Rule 07 — Labor Category Consistency

On April 2, 2026, engineer **Hannah Winters** (Test Engineer, E-4476) logged 3.0 hours under CLIN 0001 (Research & Algorithm Development). Per her official labor category assignment, her work should typically code against CLIN 0002 (Software Integration & Testing). This is not a violation — labor category cross-coding is permitted when supported by the work actually performed — but a brief PM verification note documenting the cross-coding justification is recommended for audit clarity.

Recommended action: Program Manager to add a one-line comment on Log ID #11284 confirming the cross-coding is valid (e.g., "H. Winters supported Sprint 12 algorithm dev on 4/2 — valid cross-coding per supervisor approval"). Estimated effort: 2 minutes.

WEEK-AT-A-GLANCE

April 1 – April 3, 2026

127.4	42	6/6	88%
HOURS LOGGED	ENTRIES	ENGINEERS LOGGING	PM VERIFIED

LOOKING AHEAD

Next Week (April 7 – April 11)

Monday 4/7 is a federal holiday observance for the team. Schedule adjusts to 4-day workweek. No compliance impact expected. Project burn rate remains on track for SOW Milestone 3 delivery on 4/19.

ATTESTATION

This weekly scan was generated by the PhaseOne Pre-Auditor compliance engine on Friday, April 4, 2026, 5:00 PM EST. The scan runs automatically every Friday at close of business and is distributed to the designated Program Manager. This report is advisory and does not constitute a certified audit determination.
